

## Air Quality/Noise/Vibration DBE firm Experienced with SANDAG Projects

### Outstanding Client Feedback

Entech Consulting Group has a record of receiving outstanding feedback and glowing reviews about our project performance. Below are some quotes from our clients.

**Technical Quality:** "Excellent technical knowledge"

**Management:** "Excellent follow-through and great updates."

**Communications:** " Took initiative to define appropriate tasks and direction. Communicated thoughts well in all media."

### Benefits to Entech Partnering

- ✓ Our dynamic personnel are **committed to detail, customer service and technical excellence** in supporting program, project and construction management as demonstrated through our **long working relationship** with SANDAG.
- ✓ We **know SANDAG's personnel, processes and direction**, which gives us an edge in providing diversified talent in fast-track timeframes for critical Highway and high-capacity transit projects.
- ✓ Entech serves as a **resident expert on air quality and noise** for transit and highway projects.
- ✓ Our **relationships with key regulatory agencies**—and our knowledge of their people, policies and issues—enables us **to fast-track discipline reports and streamline the permitting process.**
- ✓ Our skilled professionals blend seamlessly into any program or project management team, virtually **eliminating any learning curve** and enabling the rapid ramp-up essential to successful program management.

### Recent SANDAG Project Experience

❖ **Experience with local area, agencies, owners**—We have worked in the geographical footprint of SANDAG 's transit corridor, we know the key reviewing agencies through working relationships and advisory boards, and we understand San Diego's environment. In addition, we are accomplished at preparing all the NEPA/CEQA EA/ EIS environmental documentation encompassing air quality and noise issues.

❖ **Experience resolving environmental issues** – We work to develop mitigation measures on a myriad of local transit projects to meet FTA and other agency guidelines and address citizens' concerns so that environmental approvals are expedited.

❖ **Relationships with key local agencies** – Coupled with our knowledge of agency guidelines, procedures and protocols, these relationships enable us to fast-track discipline reports and streamline the permitting process.

### On-Call Transit Services Agreements for SANDAG –Air Quality, Noise and Vibration Studies, CA (2010 – on-going)

Since 2010, Entech has provided SANDAG with air quality, noise and vibration support under several three year On-call Transit Services Agreements.
